DETAILED ACTION

Claim Objections

1. Claim 1 is objected to because of the following informalities:
 - Line 5 states "...attitude reference system there is..." which is incorrect grammar. Examiner suggest changing to "...attitude reference system *that* is..."

Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
3. Claim 1 recites the limitation "the scale factor error" in line 2. There is insufficient antecedent basis for this limitation in the claim. Examiner suggests changing to "a scale factor error".
4. The term "comparatively" in claim 1 is a relative term which renders the claim indefinite. The term "comparatively" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. It is unclear what "comparatively fast motion dynamics" refers to and how much faster it must be.

Allowable Subject Matter

5. Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
6. Claim 2 is objected to as being dependent upon a rejected base claim.
